

Policy Summary: 2nd Amendment Freedoms

Ed Says:

"Our founding fathers knew we needed the right to bear arms to defend ourselves against criminals and a totalitarian government. It is my solemn promise that I will not allow ANY infringement on our 2nd Amendment rights."

The Problem

Government leftists whittle away at our right to bear arms through legislation and politically motivated prosecution. Consider these examples:

- Terrified Missouri citizens who were prosecuted for waving their guns at a mob that was storming their property.
- Registered gun owners in New York whose private information showed up on the internet.
- A proposed Oregon law that required property owners to flee their home, rather than defend it against a home invader.
- 2019 Supreme Court decision that held a gun manufacturer liable when a demented criminal used their brand of firearm in a school shooting.

Leftists are even trying to ban firearm accessories like stabilizing braces and pistol grips. There are no limits to what they will do to infringe upon our Constitutional rights!

The Solution

Idaho needs a governor that will stand firm against any and all attempts to infringe upon our 2nd Amendment rights. Thanks to the efforts of dedicated legislators and citizens, Idaho has some of the best 2nd Amendment protections in the nation. Ed supports those efforts wholeheartedly and will lead the fight as governor.

To protect gun owners in Idaho, Ed will:

- Not allow federal overreach to tread upon the rights guaranteed under the Idaho State Constitution.
- Protect peace officers from criminal and civil penalties if they are called upon to choose between enforcing unconstitutional federal laws or losing their jobs.
- Incentivize gun and ammo manufacturers to come to Idaho by protecting them from frivolous lawsuits and over-regulation.

The right of the citizen to keep and bear arms cannot be infringed if liberty in America is to survive.

- Ronald Reagan

Policy Summary: Abolish Idaho Income Tax

Ed Says:

"Idaho is known for its high taxes and low salaries. Isn't that backwards?"

"My plan is to abolish the state income tax and put thousands of dollars into the pockets of Idahoans."

The Problem

Because Idaho is assumed to be a conservative Republican state, taxpayers may be surprised to discover how our taxes compare nationally. For the average Idahoan earning \$50,000 a year, Idaho's state income tax is higher than 39 other states. Our sales tax is higher than 33 other states. There are 32 states which exempt groceries from sales tax--Idaho is not one of them. Our fuel taxes are higher than 31 other states. Idaho taxpayers now fund 20 agencies and 181 departments. This is inconceivable for a Republican state that is ranked 40th out of the 50 states in population.

The Solution

Ed's expertise in finance gives him an edge in developing a solid plan to reign in both taxes and spending.

1. Permanently reducing income taxes would constrict revenues and put a ceiling on the size of government. Utilizing state budget surpluses and cash and investments (PERSI pension funds **not** included), Ed will permanently phase out state income tax with no disruption to essential services. On average, Idaho taxpayers would have \$3,000 more per year in their pockets. Eliminating income taxes will create an upward economic spiral for our state and increase wages.
2. Ed will fully investigate fraud, waste, and abuse in the state budget. Currently, millions of Idaho tax dollars are funding universities and non-profit organizations that promote "Critical Race Theory and other anti-

American activities." Not one cent of taxpayer money should be spent to fund this illegal, racist ideology which is fueling the socialist takeover of our country.

3. Ed will use a line-item veto to cut the pork out of the budget.
4. Idaho's budget is bloated with wasted spending that is protected by cronyism and outright fraud. Many layers of our state government hire lobbyists to influence the legislature on their own budgets and their own oversight. On Day 1, Ed will ban all agencies of the Idaho State Government from hiring contract lobbyists or retaining full-time lobbyists as staff.
5. Taxpayers will be able to shield themselves from future tax hikes through the Taxpayer Bill of Rights (TABOR). TABOR forces the government to get state tax increases approved on the ballot in elections with an appropriate amount of voter turnout.

Bottom Line: Ed is a true small government, fiscal conservative who will fight to protect your money from fraud, waste, and abuse.

I've never understood why it is greed to keep what you've earned but not greed to take what someone else has earned.

-Thomas Sowell, Economist

P.O. Box 1667
Eagle, ID 83616

EdForIdaho.com
06/27/21

Ed Says:

"Abortion is the greatest human rights crisis of our time. What is the world missing in the sciences, culture, and arts from the 60+ million babies that never got their chance? Is it possible we've terminated the very person who might have gone on to cure cancer?"

"One day our nation will be ashamed for allowing abortion."

The Problem

Human life has inherent purpose and value. Abortion destroys families and attacks all the values that are necessary to promote strong and vibrant communities. What have we missed in the arts, in science, in our culture, because we cut short 60 million lives? There is no moral justification for aborting babies as a form of birth control. Abortions are performed for personal and social convenience, except in very rare cases, based upon consistent findings by the National Institute of Health (NIH).

The Solution

Ed sees a need to unify the pro-life movement because even the pro-lifers are divided on abortion policy. As governor, Ed would regularly meet with Idaho pro-life groups to craft a solution that will move the pro-life cause forward.

Ed does not personally believe that abortion is acceptable in any situation. Legal exceptions for rape and incest should never be seen as a primary solution for trauma and violence. Emergency care and immediate reporting of sex crimes must be the emphasized solution, not abortion. This would give law enforcement the support they need to make sure the same violence is not perpetrated on other women. In a just society, it is the perpetrator who should suffer for the crime, not an innocent baby. Ed has personally known incredible people who were products of rape and incest. He can't imagine the world without these wonderful people in his life.

Medical doctors differentiate between "abortion" and a medically necessary treatment known as "preterm parturition" to save the life of the pregnant mother and the life of the baby, if at all possible. Ed believes it is therefore not necessary to have an "abortion" exception to protect the life of the mother.

Ed supports other LIFE-focused solutions:

- Protecting parents' rights to place their child with adoptive parents who align with their deeply held religious beliefs.
- Removing barriers that hinder Church-supported agencies and pro-life agencies from reaching out to mothers in crisis.
- Using crime victim's compensation funds for rape and incest victims to receive counseling during pregnancy.
- Upholding the Idaho Constitution and protecting Idaho from federal overreach on the issue of abortion.

Abortion is profoundly anti-women.

-Blessed Teresa of Calcutta

Policy Summary: Government for the People

Ed Says:

"We need a leader who is not part of the 'good old boy' club. We need to disrupt the status quo."

"Idaho is the last foxhole for the American Dream. We can be a state that celebrates freedom and rewards hard work."

The Problem

Socialist policies like "wealth redistribution" and "central planning" have gained a solid foothold in Idaho. Too many Republicans who campaigned as "conservatives" have run a political game of "socialism-lite." Idahoans need a governor that will stand firm in the face of federal tyranny and uphold the values that made America great.

The Solution

Our Founding Fathers had a unique understanding: We progress when our God-Given Rights are protected, as outlined in the Constitution. The driving principle of Ed's entire platform is that **society benefits when families and individuals are empowered to reach for their potential**. He believes the ills of society are solved by the innovations of free individuals and strong families, not government agencies. Ed emphatically rejects the "central planning model" where society's problems are solved by "experts" who make decisions for the "collective good." Ed believes decisions need to be made at the level of government closest to the people--school boards, city councils, and county commissioners--with the voice and consent of the people.

Ed shares the alarm of those who see individual freedoms being erased in the name of the collective good.

Nowhere has this been clearer than in the state Covid-19 lockdowns where the state liquor stores were essential, but churches were shut down; where big box stores stayed open, but the small "Mom and Pop" stores were shuttered. Programs and policies based upon the collective good may sound compassionate, but make no mistake, **the aim of the collective good is collective control.**

To preserve Idaho sovereignty, Ed will:

- Begin the process of divorcing Idaho from federal grant money.
- Fight federal overreach into Constitutional freedoms.
- Require government agencies and administrative rules to be within the confines of the US and Idaho Constitution.
- Support citizen lawmakers rather than career politicians through term limits for Governor and for U.S. Congress.

Bottom Line: Ed Humphreys promises to serve the people of Idaho as a true Constitutional conservative.

Most bad government comes out of too much government.

-Thomas Jefferson

P.O. Box 1667
Eagle, ID 83616

EdForIdaho.com
06/27/21

Policy Summary: Housing Price Crisis

Ed Says:

"Government intervention, like rent control, is a shell game which always shifts costs around and is not a real long-term solution."

The Problem

The high demand for housing from people moving into the state has increased housing prices. The skyrocketing cost of building materials and a shortage of skilled labor has also impacted the problem. Current prices make it difficult for lower- and middle-income people to afford housing.

Higher property taxes also stifle the ability of many families to buy a home. Most people believe that higher property taxes are due to higher assessed property values. However, **taxation follows spending**. Property taxes are not just tied to the assessed value of your home; the spending of your local taxing district also affects your rate of taxation.

The Solution

Politicians like to appease constituents with quick fixes like rent control or a homeowner's exemption. Ed's solution is based upon solid economic principles of supply and demand. The solution needs to address root causes of the problem, such as, a shortage of skilled labor and the skyrocketing cost of building materials. Addressing these barriers, **without burdensome regulations**, will help the housing economy to flourish and meet the needs of renters and home buyers.

- **Labor shortage:** Ed would fast-track technical education that provides A+ training for the trades. High school grads could immediately enter the job market with high-paying job skills after graduation. This is a better solution than having students take on massive school loans for degrees that are not marketable.

- **Lumber shortage:** It's Idaho! To decrease the price of lumber, increase the supply. It's time to wisely manage our forests instead of letting them burn up each year. Leftist activities have severely mistreated the logging industry.
- **Property Taxes:** Ed believes a Taxpayer Bill of Rights (TABOR) will rein in the growing cost and size of government and return power to the people. A "Taxpayer Bill of Rights" establishes a formula to limit how much tax revenue the government can keep. More importantly, it requires voters to approve tax increases on the ballot. It also establishes when those questions can be put to the ballot so supplemental levies can't be snuck past the voter anymore.

Bottom Line: Ed will avoid quick fixes and offer solid, long-term, solutions to ease Idaho's housing price crisis.

The greatest leader is not necessarily the one who does the greatest things. He is the one that gets the people to do the greatest things.

-Ronald Reagan

Policy Summary: Taxpayer's Bill of Rights

Ed Says:

"Since taxation is one of the more oppressive facets of government, it should be controlled by those who pay taxes, not those who spend it."

"Giving a credit card without a limit to politicians is like letting a toddler choose their own bedtime."

The Problem

One of the best ways Idahoans can fight socialist growth in Idaho is to limit the amount of tax dollars that are being used to grow the size of government. Idaho knows:

Nothing chokes economic growth like taking money out of our pockets and using it to create more bureaucracy. Idaho taxpayers need a way to help politicians keep their promises.

The Solution

Government ought to be "by the people, for the people." Consent of the governed is a principle that elevates the power and authority of a citizenry. Since taxation is one of the more oppressive facets of government, it should be controlled by those who pay taxes, not those who spend it.

To preserve the rights of the Idaho taxpayer, Ed promises to enact a Taxpayer's Bill of Rights in the Idaho State Constitution that guarantees that state taxes cannot increase without the approval of voters. Ed believes a Taxpayer Bill of Rights will rein in the growing cost and size of government and return power to the people. A "Taxpayer Bill of Rights" establishes a formula to limit how much tax revenue the government can keep. More importantly, it requires voters to approve tax increases on the ballot. It also establishes when those questions can be put to the ballot.

In 1992, Colorado amended their state constitution to include a Taxpayer Bill of Rights, or TABOR.

In the 12 years after passing TABOR, Colorado residents' personal income grew 76% faster than the rest of the nation! And jobs grew 62% faster than the rest of the nation. That is because people had more spending money. More spending money means more business and more business means higher wages and more profits.

Taxpayers should be empowered to choose how much they pay in taxes. If we feel that we don't pay enough, then we can vote to increase them. However, if we are like Ed Humphreys, we want the government to operate inside a budget just like the rest of us.

Bottom line: Ed Humphreys will return power to the people by working to enact a Taxpayer Bill of Rights that limits taxation and the growth of government.

I've never understood why it is greed to keep what you've earned but not greed to take what someone else has earned.

-Thomas Sowell, Economist

**P.O. Box 1667
Eagle, ID 83616**

**EdForIdaho.com
06/27/21**

Ed Says:

"We love our teachers! We have great teachers! School choice is the ONLY way to get real wage growth for teachers."

"Nothing will have a more positive impact on protecting the free exchange of ideas in public education than school choice."

The Problem

As the public school system has become more controlled by the "central planning" of unions and bureaucrats, it has become less responsive to the voices of parents, students, and teachers. Half of all state tax revenues collected in the State of Idaho go to fund education, and the Educational Industrial Complex is demanding more tax dollars. In the face of rapid state growth and aggressive federal efforts to "launder" dangerous anti-American ideas into the minds of our rising generation, decisive leadership is needed.

The Solution

In the Founder's blueprint, problems are solved by returning power to the people. Families should choose how their children are educated, not lobbyists and teacher unions. More choices mean more innovation. Ed's plan will restore the free exchange of ideas, rein in the cost of the education bureaucracy, return educational choices back to the parents, and give teachers more choices within their profession. Seven out of eight members of the State Board of Education are appointed by the Governor. No real change will come to education unless you have a governor who will champion that change.

1. Ed's plan gives a voucher to every school-age student for parents to choose from a robust network of public schools, charter schools, private schools, or home-school. Opponents predictably complain that school choice will ruin our public school system. Ed believes that if tax dollars and choices are placed back into the hands of the parents and teachers, they will find the solutions to their children's educational needs.

2. Ed has pledged his support for accurate American history and patriotic civics education by signing the Governor Candidate Pledge at www.1776action.org.

Ed Says:

"We love our teachers! We have great teachers! School choice is the ONLY way to get real wage growth for teachers."

"Nothing will have a more positive impact on protecting the free exchange of ideas in public education than school choice."

Ed will defend Idaho against state tax-dollars, federal grants, and non-profit monies, that fund the teaching of "critical race theory." **He will ask each member of the Idaho State Board of Education to sign a pledge affirming the findings and recommendations of President Trump's 1776 Commission.** Any member of the Idaho State Board of Education who is unwilling to take the pledge will be asked to resign.

To those who argue that this position violates First Amendment rights, Ed asserts that the Idaho State Constitution disallows any classification of pupils on the grounds of race or color.

3. Ed's plan will reward innovation by offering low-interest loans for talented teachers to buy buildings to open small schools. Imagine how education will thrive when exceptional teachers unite their talents and curriculum choices are made collaboratively by parents and teachers.

In small school settings, teachers will have the freedom to teach at the individual student's learning level, rather than conform to rigid institutional grade-level standards. Rewarding innovation creates a system that is more accountable to parent values and student needs, where hard-working teachers thrive professionally, and poor teachers are no longer protected by unions. Teachers will also have more freedom from union influences that conflict with their political or personal beliefs.

Freedom is never more than one generation away from extinction... It must be fought for, protected, and handed on...

-Ronald Reagan

Policy Summary: State & Federal Lands

Ed Says:

"There are resources we need for national security. Idaho has them, but we are not allowed to touch them."

"We need to start wisely managing our forests rather than allowing them to burn because of federal mismanagement."

The Problem

We are not allowed to manage our own lands and use the resources that the good Lord gave us. The federal government controls over 61 percent of the lands in Idaho. Congressional power grabs [1973 Endangered Species Act, the Federal Land Policy and Management Act (FLPMA), and the National Forest Management Act (NFMA) of 1976], along with layers of bureaucracy, and endless litigation from special interests, have made it next to impossible for Idahoans to benefit from our own state lands. This undermines our state sovereignty, economic potential, and harms our education funding. We must also preserve the lands for public use and recreation.

Federal land mismanagement costs the state of Idaho significantly. Idaho gets a measly \$1.06 for each acre of federal land in the form of payment in lieu of taxes (PILT). The state received \$34.5 million on almost 33 million acres of land from the feds, but our state endowment land alone paid out \$84.5 million on only 2.5 million acres. When the feds lease federal land, only a portion of those revenues go to the state. Whereas, when the state leases state land then all the revenues go to the betterment of the state. Property and Environment Research Center (PERC) study proves how federal land agencies earn 73 cents for every dollar spent managing the land while state land trusts earn \$14.51 for each dollar spent.

Idaho once had a vibrant timber industry that has now been decimated by poor management and environmentalist lawsuits. Large wildfires on federal lands have increased 75% over 30 years.

The Solution

Make no mistake, the outcome of federal policies that stifle the use of our public lands means less jobs and more people who are on the dole of a socialist government. Idaho needs a governor who will PUSH BACK!

Federal land should be ceded to the state (with the exception of tribal lands, military installations, designated wilderness areas, and national parks). When federal lands become state lands, they will be put in permanent state land trusts and managed by the state.

Idaho has resources, such as cobalt and antimony, that are not found in any other state but are critical for national security. We must be allowed to harvest these resources. This will not only boost our state's economy but will reduce our dependence on countries like Russia and China.

We have new technology and environmentally friendly ways of harvesting our natural resources. It's time to wisely manage our forests instead of letting them burn up each year. Leftist activities have severely mistreated the logging industry. We must reject the "special interest science" used by environmentalist fear mongers and free up our natural resources for responsible use.

Idaho's lands must be preserved and protected for recreation and enjoyment by sportsmen and outdoor enthusiasts. We will keep the lands in an iron-clad land trust and they will NOT be sold off.

Bottom line: We need our public lands to actually benefit the public!

**P.O. Box 1667
Eagle, ID 83616**

**EdForIdaho.com
10/21/21**

Policy Summary: Critical Race Theory (CRT)

Ed Says:

"I walked away from a successful financial practice to run for Governor. Our family is putting everything on the line right now because we wholeheartedly believe it's now or never to make a serious course correction."

The Problem

Idahoans, like the rest of America, have a clear choice to make about the direction of our state: Are we going to continue down the road to socialism or we going to embrace American values? This is the time to be informed, to be prayerful, and to fight with the Biblical tools used triumphantly by great leaders, like Martin Luther King and others.

Socialists are nefariously clever at disguising their message. Using "compassion," "diversity," and "tolerance" as a cover, they slander the Founders, distort history, and create racial divide. They wage war against the traditional family and the Judeo-Christian ethic. They erode freedom of speech and the rule of law in the name of "social justice" to demoralize and silence us. There is nothing new about this "road to serfdom" which has destroyed millions upon millions of lives through the ages.

CRT and its socialist tentacles have infiltrated every institution of our society: schools, the military, corporations, media outlets, the legal system, and every level of government. Ironically, CRT is being funded by you, as you pay your taxes, support non-profit organizations, and do business with "woke" companies.

The Solution:

The Greek root for the word "governor" means the one who steers the ship's rudder. The governor determines direction. Ask yourself: Which candidate is going to contend for your values? Ed doesn't just talk about critical race theory, he acts decisively:

- Ed introduced a bill in the last legislative session to ban critical race theory in public schools. Unfortunately, a weaker bill was passed to get the governor's signature.
- Ed partnered with influential legislators to defeat HB226, a \$6 million supplemental appropriation bill that would fund Idaho preschools through a non-profit organization that promoted CRT. The governor pushed for the preschool funding.
- Despite the fact that CRT is unlawful under our Idaho State Constitution, which disallows any classification of pupils on the grounds of race or color, the Idaho State Board of Education met to consider adding "diversity" education to Idaho schools (June 28, 2021, Meeting). Seven out of eight of these board members are the governor's appointees. Ed publicly called for the resignation of any board member who supported the measure. As governor, he will call only board members who pledge to affirm the findings and recommendations of President Trump's 1776 Commission.
- A central feature of Ed's campaign has been educating the public about the dangers of CRT. We can't fight evil if we don't understand it. We urge you to download our CRT brochure at www.edforidaho.com

Join the fight! The forces of the opposition are well-funded and numerous. The NEA, poised to generously fund the governor's campaign, has vowed to target anyone who opposes CRT in public education. Volunteer at www.edforidaho.com/volunteer

Policy Summary: Idaho First CCP Policy

Ed Says:

"Let me be perfectly clear. The Chinese Communist Party (CCP) is an enemy to Idaho and an enemy to America."

The Problem

The Chinese Communist Party (CCP) has developed a dangerous network of influence in government, education, agriculture, infrastructure, and business. They have targeted leaders at all levels of government, including Idaho leaders, to advance CCP interests and policies under the guise of building cultural ties and economic alliances. The CCP uses academic and economic arrangements to penetrate US innovators, such as Micron, and steal their ideas and technology. University programs, such as the Confucius Institute and Chinese Students and Scholars Association (CSSA) which are found in Idaho universities are used to sanitize the public image of CCP's murderous policies and soften students to anti-American indoctrination. On January 19, 2021, Donald Trump issued what may prove to be the most important Executive Order of his presidency. He declared a national emergency arising from the investments unwary Americans are being induced to make in the Chinese Communist Party's military-industrial complex.

Idaho must awaken to the true intentions of the CCP which monitors and corrupts Chinese companies and individuals to be surrogates of its criminal regime. We must recognize how state leaders and institutions in our state have been targeted. Strong steps must be taken to protect our state from the nefarious influence of our foreign adversaries.

It is important to make a distinction between people who are surrogates of the CCP regime and the good people of China who suffer persecution and death for seeking the basic freedoms we enjoy in America.

The Solution

Following Donald Trump's America First Policy, Ed will lead, along with other states such as Florida and Texas, in pushing for legislation that would ban individuals or companies connected with China, Iran, North Korea, Russia, from entering into contracts relating to the state's critical infrastructure. Other proactive steps include:

- Prohibit foreign purchases of Idaho land by any individual or corporation that has ties to the CCP
- Prohibit transactions with CCP technology companies
- Prohibit specific arrangements between state-funded universities and K-12 schools
- Require colleges, state agencies, cities, and counties to report gifts made indirectly or directly by foreign governments
- Fully investigate what Idaho interests have been compromised by the CCP
- Criminalize the theft and trafficking of trade secrets
- Condemn CCP organ harvesting, religious persecution, and genocide
- Protect innocent Chinese Americans and Chinese VISA holders from CCP persecution on American soil
- Commemorate victims of communism who risk their lives for the cause of freedom.

The single greatest threat to the United States comes from the Chinese Communist Party.

*-Mike Pompeo
Former Secretary of State*

Policy Summary: Nuclear Energy

Ed Says:

"Enough is enough with the lies and deceit surrounding nuclear energy."

"People fear nuclear energy because it was developed from nuclear weapons; if electricity was developed from the electric chair, they would fear electricity too."

The Problem

Most Americans don't realize that the peaceful application of nuclear energy was born in Idaho. In 1951, Idaho scientists made history by lighting lightbulbs with nuclear energy. In 1955, Arco, Idaho was the first town powered solely by nuclear energy. Clean and abundant energy was born in Idaho almost 70 years ago, but we've abandoned our heritage and turned our backs on it because of political operatives and lobbyists who spread misinformation to advance certain corporate and foreign interests. In the past 70 years, less than two dozen people in the US have died from the peaceful use of nuclear energy. Nuclear energy is safer than driving a car!

Despite all the political challenges, the Idaho National Laboratory (INL) is the largest nuclear facility in the United States. It's one of the largest employers in Idaho and even in its "throttled back status" contributes about \$2 billion to Idaho economy. The reality is that the peaceful applications of nuclear energy has faced a constant assault from greedy corporatists who profit when clean, abundant energy sources aren't available and from foreign actors trying to prevent America from outpacing the rest of the world technologically.

The Solution

Nuclear energy provides 20 percent of the nation's energy and 55 percent of the nation's "clean energy." Nuclear energy has proven to be one of the safest forms of power generation, despite the "fear-mongering" of activists. Due to the INL's long track record of nuclear energy research and development, the INL is poised to lead the next generation of nuclear reactors, which are cheaper, smaller, and even safer.

To protect nuclear energy, Ed will:

- Support the efforts at the INL so that Idaho can be home to the world's foremost scientists and engineers. Ed will support Science, Technology, Engineering, and Math (STEM) jobs through a university pipeline to the INL.
- Work with Idaho's Congressional delegation to support the Advanced Nuclear Fuel Availability Program, which will establish a consortium of advanced reactor companies to purchase high-assay low-enriched uranium (HA-LEU), currently not commercially available in the US.
- Fight misinformation by lobbyists and foreign actors who do not have our national interest at heart. The United States and Idaho must lead in global energy rather than cede its influence on nuclear security to China and Russia. Currently, US taxpayers are on the hook for about \$2.5 million a day in liabilities to power companies while a clean, carbon-free, sustainable energy is being wasted.
- Push for policies that protect Idaho's nuclear energy innovation from technology theft by foreign enemies like the CCP.

Bottom Line: As Governor of Idaho, Ed will champion nuclear power.

Nuclear fuel is extremely dense. One uranium pellet (1 inch tall) is equal to 17,000 cubic feet of natural gas and 120 gallons of oil. Nuclear energy produces more electricity on less land than any other clean air source.

Ed Says:

"If you believe in the economic policies of Ronald Reagan, Margaret Thatcher, and Donald Trump, then you can't argue with me. Every time we cut taxes and shrink government, we all do so much better!"

The Problem

In theory, conservatives understand the Reagan model, that reducing taxes boosts the economy and stimulates job creation. In reality, our state has adopted a "socialism-lite" model where the size and cost of government is growing, and innovation and entrepreneurs are stifled by excessive taxes, burdensome regulations, and difficulties finding employees who are equipped with the knowledge for today's in-demand jobs. Boosting private sector, good-paying jobs is a by-product of common-sense policies in areas like education, state land management, and tax policy. Job growth happens when we wisely manage Idaho's natural resources and protect vital industries like agriculture and nuclear energy.

The Solution

Nothing will boost the economy and create better paying jobs more than abolishing the income tax. If the average Idahoan has \$3,000 more in their pocket, then there will be more money spent on the good and services our businesses provide. More sales means higher wages, more jobs, more profits.

To support more innovation and family-wage jobs, Ed will:

- Fast track technical education that provides training for the trades and give direction to high school graduates who can't afford expensive college loans.

- Protect the state's agricultural industry that provides 185 different commodities on 25,000 farms and ranches and is vital for our economy, lifestyle, and national security.
- Support the efforts at the INL, so that Idaho can be home to the world's foremost scientists and engineers. Ed will support Science, Technology, Engineering, and Math (STEM) jobs through a university pipeline to the INL.
- Fight to open up Idaho's natural resources on state lands now controlled by the federal government, such as the logging industry. Make no mistake, the outcome of federal policies that stifle the use of our state lands means more people who are on the dole of a socialist government.
- Ed will fully implement an Idaho First CCP policy where he fully investigates what Idaho interests have been compromised by the CCP and criminalize the theft and trafficking of trade secrets.

Entrepreneurs and their small enterprises are responsible for almost all the economic growth in the United States.

- Ronald Reagan

Policy Summary: Refugee Resettlement

Ed Says:

"We have law enforcement officers, teachers, and nurses who can't afford housing. We must place a moratorium on refugee resettlement until our state can keep up with the growth happening in Idaho."

The Problem

Our nation has an incredible legacy helping the downtrodden and oppressed throughout the world. Unfortunately, like so many well-intentioned programs, our compassion is betrayed as our tax dollars are funnelled to politicized non-profit groups and government entities that promote open borders, critical race theory, and socialist welfare entitlements. **Idaho is the third-highest state in per capita refugee resettlement. We accept more refugees than eight other states combined.** However, it is not the State of Idaho that decides where refugees come from, it is the United Nations High Commissioner for Refugees (UNHCR) that typically decides through a process that is discriminatory to Christians. Many countries in the Organization of Islamic Cooperation (OIC), the largest voting bloc in the UN, have outlawed Christianity, which explains why the vast majority of refugees are non-Christian. Considering that the UN body elected Communist China to its Human Rights Council, the UN has not proven they can act in the interests of the US. As socialism spreads throughout the world, one does not need to wonder why a disproportionate number of refugees are placed in conservative states.

Trump's efforts to mandate America First policies, reducing the cap on refugees and giving preference to persecuted Christians, have been reversed by the Biden Administration. Under Trump, Idaho settled 66 refugees per year. Now, under the Biden's administration's increased cap, **Idaho's International Rescue Committee (IRC) is gearing up for 600 refugees per year.**

The Solution

It goes without saying that **strong leadership is needed to implement Idaho First policies.** Because the US is party to a 1967 UN Refugee Convention treaty which guarantees refugees the right to housing and public assistance (welfare), taxpayers bear the responsibility for refugees who cannot support themselves after the eight months of assistance provided by the IRC. Idaho is already experiencing a housing price crisis and a housing shortage. Also considering the Biden Administration's reckless vetting and settling of refugees crossing the Southern US border, and the poor track record of the UN, **a moratorium on refugee resettlement is imperative.**

The US Constitution grants the powers of naturalization specifically to Congress alone. The power of the Governor is VERY limited on immigration issues. However, the Governor can craft a refugee resettlement policy that does not harm Idaho. To compassionately aid the plight of refugees, we must support private organizations and aftercare that are not funded by our tax dollars, and that operate within the best interests of our state and country.

I will suspend immigration from regions comprised of radical Islamic terrorists, including the suspension of the Syrian refugee program, which is taking in thousands and thousands of people that we have no idea where they come from, no idea who they are.

-President Donald J. Trump

P.O. Box 1667
Eagle, ID 83616

EdForIdaho.com

Policy Summary: Medical Freedom Policy

Ed Says:

"The danger of government bureaucrats and corporations making medical decisions for the rest of us cannot be understated."

The Problem

Too many in Idaho leadership celebrate mass conformity and scorn questions from regular folks as ignorant. But conformity and conscience don't go hand in hand. Forcing others to undergo medical treatments for the "collective good" is wrong, plain, and simple. **Make no mistake, the aim of the collective good is collective control.**

Not only is the need to control your neighbor an immoral one, but equally distasteful is the obvious conflict of interest when hospitals mandate employee vaccinations. St. Luke's alone has received almost \$130 million from the federal Health & Human Services Provider Relief Fund. Additionally, the COVID-19 Coverage Assistance Fund guarantees healthcare providers money for each vaccine administered.

In the wake of CDC flipflops and the censoring of medical professionals who oppose government claims, the public no longer trusts that health recommendations aren't based upon "special interest science" which now pervades every aspect of our lives. For example, in a June 2021 proposal, the American Medical Association (AMA) stated that recording a person's biological sex on a birth certificate can result in "confusion," "discrimination," and "violence." St. Luke's now uses the terms "birth patient" and "non birth parent" in place of "mother" and "father" on birth certificate information forms. People who value freedom can no longer leave personal health decisions to the so-called "experts."

The Solution

The danger of government bureaucrats and corporations making medical decisions for the rest of us cannot be understated. An individual's power to decide for their own health should be preserved and promoted. Families should be empowered to make their own medical decisions and choose the treatment option that best fits their beliefs, values, and needs. To preserve medical freedom, Ed will:

- Ban employer-mandated vaccinations. (Oregon banned health care employees from being required to vaccinate over 30 years ago. Their hospitals have been just fine until the ultra-politicized COVID experimental treatment came around.)
- If a ban on employer vaccine mandates is unattainable, then, at a minimum, make employers legally liable for damages incurred by employees due to adverse health effects from any mandated treatment. Employers who mandate medical treatment must maintain 50K in an insurance fund for each employee for 20 years.
- Ban mask mandates in Idaho schools.
- Ban government agencies and big business from requiring vaccine passports.

Conformity is the jailer of freedom and the enemy of growth.

-John F. Kennedy

Policy Summary: Election Integrity Policy

Ed Says:

"I was deeply unnerved the night of the election after hearing Trump's speech... When I realized the courts would do nothing, I felt compelled to act."

What Ed Has Done to Make Every Vote Count

In the wee hours of November 4, 2020, Ed started on a path that led to the formation of the Citizens Committee for Election Integrity and their *14 Minimum Standards for Fair and Honest Elections*. These standards have been adopted by the Idaho State GOP and became the model for the National GOP. They were read into the US *Congressional Record* on January 6, 2021. The timely wisdom of these standards in protecting Idaho from the fraud has been proven by post-election audits in other states since the 2020 election

What Ed Will Do to Protect Every Vote

Working with the legislature, Ed will:

- Fix chain of custody vulnerabilities
- Ban "ballot harvesting"
- Establish waiver of fees for Photo ID for individuals with severe financial hardship
- Make sure legislature maintains legal standing over elections
- Prohibit early vote counting
- Strengthen citizenship verification procedures
- Restrict private drop boxes
- Establish more stringent procedures to verify the accuracy of voter registration lists.
- Ensure voting tabulators have no "back door" connections to the internet
- Investigate clear evidence of election fraud in the 2020 election
- Establish post-election audit requirements for future elections.

Issues Addressed in the 14 Minimum Standards for Fair and Honest Elections:

- No minimum distance in observing the vote
- Secure chain of custody at all times
- Equal voting standards across the state
- Voter ID and signature verification required
- Use of physical paper ballots only
- Auditable tracking system for all ballots
- Total number of printed ballots must equal the sum of cast ballots, spoiled ballots, and unvoted ballots
- Ballot tabulation conducted by two independent, unrelated systems
- Tabulation machines to tabulate only with no modification of ballots or internet connection
- Ballot counts must be reconciled with voter records before election can be certified
- Voter rolls purged 180 days before an election
- Election laws and regulations can't be changed for 180 days prior to election
- Election records preserved for 22 months
- Voter ID for provisional ballots must be verified prior to that ballot being counted
- No automatic voter registration when driver's license issued ("motor voter")

The ballot is stronger than the bullet.

-Abraham Lincoln

Policy Summary: How We Fund Our Own Demise

Ed Says:

"Idaho is the last foxhole for freedom and the American Dream. It is no surprise that families are flocking here. But that promise is being sabotaged. Every time you pay your taxes you are footing the bill for the destruction of America."

The Problem

Raising your family and working hard are integral to realize the promises of this land. Sadly, there are hordes of political operatives who have craftily hijacked the system to ensure their personal political agenda is implemented while you are occupied living your best life. Now, every time you pay your taxes you are footing the bill to ruin Idaho and destroy the American Dream.

Untold millions of our tax-dollars are funneled into private organizations who employ teams of activists that implement their political agenda. Most of these organizations have nice sounding names and excellent marketing. Their stated purpose often seems reasonable and necessary.

Everyone supports more funding for public education, but education dollars fund the Idaho Education Association (IEA), a subsidiary of the NEA which announced they are putting tens of millions into a legal fund to take down anyone who opposes critical race theory. Education dollars also fund liberal textbook companies that promote special-interest science and socialism as "an economic system that makes up for the shortcomings of capitalism."¹

It is hard to argue against funding preschool to help youngsters to get a jump start on learning, but who wants tax dollars funneled to a subsidiary of the NAEYC which promotes "anti-bias education" and claims that white children need education to prevent "internalized oppression."

¹ <https://idahofreedom.org/school-superintendents-ignore-record-of-failure/>

We have long supported PBS favorites like Sesame Street, but do we want to fund an agenda that says even babies have "white privilege?" What about NPR that uses your money to fund "anti-racism workshops for NPR and Member stations." Socialist activists have job security in Idaho just as much as in California.

Taxpayer funded non-profits do an incredible job at organizing efforts to ensure their chosen candidates and causes are successful during elections. If you continue to ignore that you are paying activists to harass our communities, then you are helping to ruin Idaho and destroy the American Dream.

The Solution

It is no longer acceptable to funnel our hard-earned money into the coffers of political operatives and activists. It's time for change!

- We need a free exchange of ideas instead of a subsidized exchange of pre-approved ideas. Idaho needs school choice
- On day one as Governor, I will ban all state agencies from hiring lobbyists. Also, I will wield the line-item veto to cut the special interest pork out of the budget.

If we have to play Whack-A-Mole all over this state, stopping this critical race theory, we will do it.

- Florida Governor Ron DeSantis

P.O. Box 1667
Eagle, ID 83616

Ed Says:

"Since owning a home is a core idea of the American Dream, we must fix the property tax problem to protect it."

The Problem

Rising property taxes. Property taxes weigh heavily on Idaho. We collectively pay about \$2 billion per year. With home values climbing like a caffeinated kid on a jungle gym, the annual letter from the County Assessor is not a letter many of us look forward to.

Unpredictability of homeownership costs. Would you promise to buy something if you didn't know the price? One of the biggest problems with property taxes in Idaho is that no one knows what they will look like from one year to the next. Not only are assessed values unpredictable, but special levies sneak onto our tax bills because they were voted on in elections with low voter turnout.

Impact of population growth on seniors and other taxpayers. Senior citizens on a fixed income should NEVER be driven from their homes due to unpredictable and rising property taxes. It's not reasonable to demand individuals on a fixed income pay to provide infrastructure to people who are moving here.

Rising taxes fuels increased government spending. Rising property taxes, like other taxes, contribute to growth in the size of government. Nothing chokes economic growth and personal freedom like taking money out of our pockets and using it to create more bureaucracy. We want the government to operate inside a budget just like the rest of us.

The Solution

Property taxes fund essential services in schools, and in our county and city governments. If you eliminate property taxes, funding for local governments must come from the state. You will have the state government dictating to the municipal governments how to run themselves. It will be disastrous! However, action must be taken to relieve Idahoans of the increasingly heavy burden of property taxes.

As a finance expert, Ed is uniquely qualified to innovate sound solutions to the tax problems in our state. His solutions for property tax relief are sound and simple:

1. When you buy your home, you should know what the maximum property tax cost will be over the lifetime of owning the home.
2. Property tax increases should be capped at no more than 2% per year. Ed's proposed Taxpayer's Bill or Rights (TABOR) will require voters to approve tax increases on the ballot, putting you in control of how much tax revenue the government can keep.
3. Supplemental levies from schools, which significantly impact property taxes, were ruled unconstitutional by the Idaho Supreme Court. As Governor, I will demand every agency of the state government to honor and respect the Constitution.

Bottom Line: Growth should pay for itself! No one should lose their home from unpredictable and skyrocketing property taxes.

Ed Says: *"The Great Reset is a poison in the veins of the nation."*

"ESG Credit Scores are a measure to control the economy, our behavior, and corporate behavior."

The Problem

The Great Reset is a "revolution," **"a fundamental change in the way we live, work and relate to one another... and even what it means to be human."**¹ This global utopia requires conformity to the UN's 17 **"Sustainable Development Goals" (SDG)**.² The Great Reset was officially launched in the midst of the pandemic: **"We should take advantage of this unprecedented opportunity to reimagine our world."**³

ESG Credit Scores are a measure to control our economy, our behavior, and corporate behavior, to measure our compliance with SDGs. ESG Credit Scores **target all aspects of our financial lives:** business loans, investing, retirement funds, car loans, mortgages, and insurance. Who assigns ESG Credit Scores? The big banks and finance companies. You will have access to money, goods, and services based on how you conform in areas of the Environment, Social Justice, and Governance (ESG). For example:

Environment: If you are an oil company or deal with nuclear power, you will be downgraded.

Social Justice: You are upgraded if you support "woke," anti-police and anti-white causes on social media.

Governance: You are upgraded if you meet quotas for women, racial and LGBTQ+ minorities in your company.

In **Stake Holder Capitalism**, big corporations and investment companies make their money off of their relationship with governments and how they "tow the government line." It's not consumer wants and needs that drive production, it's SDGs that tell you what you should buy. Conforming to The Great Reset agenda means big profits. ESG investing has grown from \$10 billion in 2015 to \$246 billion in March 2021.

The hard truth is that we are destroying ourselves with our own tax dollars.

- The Idaho Department of Commerce gave a \$50 million tax break for Facebook to build a META center in Kuna. We pay our tax dollars to reward a corporation that wants to permanently silence us.
- Corporate members of the Idaho Association of Commerce and Industry (IACI) who now promote SDGs⁴ are big donors to our Governor and our state leaders. These same leaders have refused to act to protect basic medical freedoms. Their excuse is that the "government should not interfere in the relationship between private business and their employees." Ironically, it is those same businesses, with their lobbyists, that keep them in power and advise them on how to spend our tax dollars.
- The healthcare systems are heavily subsidized by taxpayers at the federal, state, and local levels. Add in a slush fund of millions of federal COVID dollars that reward the implementation of federal policies and mandates, and you have a perfect storm of corruption where our tax dollars are funding the destruction of our freedoms.

⁴ <https://redoubtnews.com/2021/09/idaho-assoc-of-commerce-industry-iaci-is-promoting-agenda-2030/>

Ed Says:

"The Great Reset is a poison in the veins of the nation."

"ESG Credit Scores are a measure to control the economy, our behavior, and corporate behavior."

Ultimately, The Great Reset creates a two-tiered system where government leaders and big corporations gain more power and wealth, while the rest of us are trapped in a smothering form of fascism. Idaho has to pave the way and show the rest of the country that there is a way out of this insanity.

The Solution

Glenn Beck says that qualifications to address The Great Reset should be **the #1 Litmus Test** for choosing a candidate. We have to put aside personalities and get serious about qualifications. Our Governor is part of the problem, and our Lt. Governor plans to reward big corporations by eliminating corporate income tax. As a finance expert with specific expertise in modern monetary theory (the economic system the Left is using to destroy our economy), I am the only candidate who is qualified to protect Idaho from The Great Reset.

- I will not use our tax dollars to reward multi-national corporations with property tax breaks and will review tax loopholes being given to multi-national corporations.
- I will use Idaho Code 67-802 which grants the Governor the authority to "require the attorney general or the prosecuting attorney of any county to inquire into the affairs or management of any corporation existing under the laws of this state" to investigate the hospital corporations. My only question: What did the hospital execs do for frontline healthcare workers and ICU capacity with the HUNDREDS OF MILLIONS they received of our tax dollars?"

- I will use Idaho Code 67-802 to investigate Facebook for censorship and shadow-banning.
- I will not cut deals with multi-national corporations that use water needed by farmers.
- I will work with the legislature to enact a bill to protect Idaho Citizens from ESG credit scores.

Bottom Line: My goal is to create a "caustic environment" for corporations that push The Great Reset.
